EQUIPMENT INVENTORY MANAGEMENT

MAINTENANCE CONNECTION®

STOP RELYING ON MAKESHIFT INVENTORY CONTROL PROCESSES

- Stop the impossible task of managing equipment inventory in spreadsheets, especially as it frequently changes hands and locations. Maintenance Connection allows you to easily manage your on-hand, available and reserved inventory items.

- Ramp up quickly. It's easy to get information into the system. And, it's easy to find the information you need for techs to perform work.

- Don't worry about getting your team to stick to the plan. Maintenance Connection provides a central, comprehensive database of equipment with detailed manufacturer, location and status information.

IMPROVE SPEED & ACCURACY WITH ADVANCED FEATURES

- Save time and avoid mistakes through automated inventory control. Maintenance Connection's automation features include min/max values, reorder points, alternate items, material transfers and more.

- Improve Accuracy and Productivity with Barcoding: Maintenance Connection offers native, mobile device-based barcode scanning that easily integrates with most barcoding software platforms, drastically reducing cost-of-adoption while helping to drive productivity and efficiency.

- Never get stuck without the right equipment. With Maintenance Connection, you can reorder items within the system or just use automated re-ordering.

EQUIPMENT INVENTORY MANAGEMENT

Inventory management measures accurate quantities of equipment on hand by location. Powerful barcoding options adds the ability to perform quick inventory counts, conduct check in/out procedures for parts needed to complete tasks, and quickly add parts to Work Orders.

QUICKLY ACCESS INFORMATION WHEN AND WHERE YOU NEED IT

- Integrate inventory details with other parts of the CMMS, such as the work order management module, to easily access information without having to hunt it down in the system.

- Equipment information is at your fingertips. With MC Express, a mobile CMMS solution from Maintenance Connection, technicians can keep track of equipment in the field with a mobile device.

- Track equipment information across multiple sites, locations and even countries. With multilingual editions, techs across the world can see what equipment is used at various sites, along with key vendor specification and maintenance history details.

SPARE PARTS INVENTORY MANAGEMENT SOFTWARE

Gain more effective control of parts and material inventories. Save time and improve operations with automated features, barcoding, mobile access and more in Maintenance Connection's parts inventory management software.
